Summary

Highly effective and results-driven Software Development Engineer with 5+ years of full-stack experience in building scalable web applications and distributed enterprise platforms. Proven expertise in the Java ecosystem (Spring Boot, REST APIs, Microservices) and modern frontend frameworks (Angular, React). Successfully delivered business-critical features, optimized system performance, and resolved complex production issues across multiple high-stakes projects.

Professional Experience

AADHTECH LLC **Remote**

Software Engineer **Nov 2023-Present**

- Designed and implemented 25+ new POS features, improving operational workflows and increasing system capability for pawn shop management.
- Architected loan management and payment scheduling features, supporting complex financial workflows and payment.
- Diagnosed and resolved multiple high-impact production issues, improving system stability and reducing operational disruptions.
- Optimized frontend-backend communication through efficient API design and structured data models.
- Leveraged AI-assisted development tools (Cursor, Claude) to accelerate feature development, improve debugging efficiency, and reduce implementation time.
- Collaborated in Agile development cycles, delivering features consistently within sprint deadlines.
- **Technologies:** Java, Spring Boot, Angular, REST APIs, MySQL, AWS, Git, Hibernate, JPA, Twilio

VAKEN TECHNOLOGIES **Trichy, Tamilnadu**

Software Development Engineer **Mar 2021- Nov 2023**

- Developed and integrated the MDM application, enabling remote management of smartphones and tablets.
- Utilized Android Management API to provide a secure and scalable solution for managing Android devices. Implemented features for remote device management, security, and information management for Android devices, meeting the needs of various use cases.
- Designed and implemented key features, including task management, attendance management, timeline, safety management, and stress report in the WorkEco app.
- Demonstrated ability to diagnose and resolve complex software issues, improving overall functionality and user experience.
- Excelled in collaborative environments, leveraging interpersonal skills to build strong working relationships and drive team efficiency.
- **Technologies:** Java, Spring Boot, React, Android Management API, MySQL, REST APIs, FCM, Android Studio

Education

SNS College of Technology **Coimbatore, Tamilnadu**

Bachelor of Engineering, Electronics and Communication Engineering **2016-2020**

Additional Information

- **Program Management:** SDLC (Software Development Life Cycle), Agile Methodology, Jira
- **Backend:** Java, Spring Boot, Microservices, REST APIs, Hibernate, JPA
- **Frontend:** Angular, React.js, TypeScript, JavaScript, HTML, CSS
- **Database:** MySQL, DynamoDB
- **Cloud/DevOps:** AWS, Firebase Cloud Messaging (FCM), Git, CI/CD Concepts
- **AI Development:** Cursor IDE, Claude AI, AI-assisted debugging, Prompt-driven development
- **Certifications:** Oracle Certified Associate, Java SE 8 Programmer, Claude 101 by Anthropic
